DESCRIPTION OF SERVICES

VIDEO AND FILM PRODUCTION (541-4B)

Ferrari Films, Inc., provides video and film production services designed to provide key educational and promotional messages for the Government. Ferrari Films services include, but are not limited to, concept development, creative design, writing, directing, shooting, casting talent, animation, editing, narration, customized music scoring, sound effects, fixed media authoring, replication, and video streaming development. Ferrari Films shoots on all formats up to 4K. The Ferrari Films team has substantial experience producing educational and training videos, documentaries, dramatic programs, promotional videos, web sites, computer-based training, and commercials. From its founding in 1996, Ferrari Films has had the privilege of serving the U.S. government by developing award-winning medical multimedia.

INFORMATION TECHNOLOGY (C132-51)

The information technology services provided by Ferrari Films and its subcontractors include but are not limited to resources and facilities management, database planning and design, systems analysis and design, network services, programming, conversion and implementation support, network services project management, 3D and 2D animation, and data/records management. These form the basis for two main categories of service. Those categories are:

1. Software and Application Design

One primary service provided by Ferrari Films is the creation of computer and mobile apps, designed to provide the most powerful interactive technologies available to military and Government clients.

Specific services provided by Ferrari Films and its subcontractors include content development, programming, interface design, replication, and distribution support of these application programs. Software maintenance is provided on a long-term basis.

2. Web Services

A second key service provided is the design, maintenance, and hosting of a variety of websites, which provide interactive education.
